Mr. Robert W. Frederick  
CopperWatcher™ -- THE COPPER THEFT SOLUTION  
Bedford, Texas

Dear Mr. Frederick,

From our first conversation with you, I knew we chose the right product to protect our air conditioning systems. We researched for some time and spoke to numerous companies comparing their products to the CopperWatcher™. Not one of them was as comprehensive as the CopperWatcher™.

I contacted our existing alarm company, ADT, to have the CopperWatcher™ installed and I quickly found out how unresponsive a company could be. ADT was not willing to work with us at all. Their answer to protecting our air conditioning systems was they could install a motion sensor and camera and said they would have a sales representative contact me with the details.

Due to the lack of response and protection knowledge by ADT, a change had to be made. I contacted a local alarm company Dallas Security Systems who installed the CopperWatcher™ for us. The installation was seamless from start to finish. By the way, ADT finally called me back on the same day our new system was installed. We will not be renewing our contract with ADT.

I am so pleased to let you know that the CopperWatcher™ system has come to our rescue already. I came to work the other day to find the CopperWatcher™ alarm system activated. We went to the air conditioning system location, found ALL units still intact. What a relief, after further investigation, we found that the refrigerant had leaked out of one of the air conditioners. Repairs were made quickly and the system was placed back in operation.

The CopperWatcher™ system can not only prevent a theft, but as we found out, it can also protect the air conditioner from damage by detecting a loss of refrigerant. Who knows how long the air conditioner would have run and what damage the loss of refrigerant would have done if CopperWatcher™ had not alerted us immediately. What a "value added" benefit this was for us!

To say thank-you doesn't convey to you how we really feel about the CopperWatcher™ system. Needless to say, I have been recommending the CopperWatcher™ to everyone we have contact with.

We now have CopperWatcher™ protecting a total of fifteen air conditioning units at our two different business locations and feel comfortable that our investment in air conditioning equipment is being protected by your CopperWatcher™ system.

Thanks again,

Linda Shamka
